

Status of the RAON heavy ion accelerator

Friday, November 15, 2024 10:00 AM (25 minutes)

Status of the Ar⁸⁺ beam commissioning and user service of the RAON is presented. Beam tuning was done with Ar⁸⁺ beam and test of experiment systems such as KoBRA and NDPS were done. And Ar⁸⁺ beam was provided for users of the KoBRA. Na⁵⁺ rare isotope beam from the ISOL was accelerated by the superconducting linac and used to test the experiment system.
